### Education

#### Master of Engineering

Computer Science and Engineering  
(2016-2018)

#### Bachelor of Technology

Information Technology  
(2007-2011)

### Skills

- Python
- SQL
- PLSQL
- C
- C++
- Java
- Oracle database
- MySQL
- Meta Solv application

### Profile

Highly skilled developer with 4+ years of experience, seeking to utilize proven Python, Oracle and PL/SQL skills to enhance data management and drive improvements in organizational efficiency. Aiming to contribute expertise in data modeling, database design, data analyst and performance optimization to support the effective utilization of data as a strategic asset

### Experience

#### I.F.E.T. College of Engineering

**Assistant Professor 2020 -Present**

- Provided tutoring and mentorship to young technocrats in problem-solving using Python programming, C, and SQL.
- Guided students through various programming concepts and algorithms, helping them improve their problem-solving skills and understand core programming principles.
- Mentored projects using Python programming, offering guidance on code structure, best practices, and debugging techniques.
- Designed lesson plans and learning materials tailored to the students' skill levels and learning objectives, ensuring a comprehensive understanding of programming concepts.

#### Prodapt Solutions Private Limited

**Senior Software Engineer 2011 – 2016**

Project 1: Windstream Metasolv Production Support Client:

##### **Windstream Telecommunications, U.S.A**

- *As a PL/SQL Developer, I performed assigned system updates and served as the primary contact for SQL support queries.*
- *I collaborated with support professionals to ensure comprehensive system maintenance and resolved code-level issues.*
- *Additionally, I gathered user feedback to improve the software experience and served as a mentor, guiding junior team members in understanding the application.*
- *Furthermore, I acquired expertise in MetaSolv functionalities and gained hands-on experience with versions like M6.0.15 and M6.2.*

Project 2: CenturyLink - Network Inventory Consolidation Client:

##### **CenturyLink Telecommunications, U.S.A**

- *In my role as a project leader, I demonstrated strong leadership skills by leading sprint planning meetings and effectively assigning tasks among a 12-person project team.*
- *I successfully managed workload and priorities to ensure timely achievement of project milestones.*
- *Additionally, I prioritized clear communication between the development team and the client, ensuring a smooth transition of requirements and specifications.*
